

Requested Proposal For MRI Construction As It Pertains To Park Street

The Richland Hospital is requesting that for a 5-6 time period beginning on or around 8/24/2020 that half of North Park street be closed. Closing this half of Park Street would allow the Richland Hospital to continue giving our community members access to MRI scanning during this time. The proposal we have is listed below...

1. Close N. Park street from the corner of 1st and Park, North towards 2nd street to the first driveway on Park Street. This will allow house 432 and 462 to still have access to their driveways. They will have to come up 2nd street and turn right down the one way street backwards.
2. There will be barricades placed on the corner of 1st and Park that will keep drivers from turning left onto N. Park Street.
3. There will be barricades placed on the South side of the driveway for house 432 to allow access to these driveways.
4. The MRI truck that is currently parked on the hospital side of the street will be moved to a more center to opposite side of the street to allow for patient access and the ability to continue MRI services during this time period. Brian Jones has been notified to review for any Fire related concerns. The post office has discussed this with the mail carrier and as this block is a walked block for delivery the mail carrier was accepting of the truck close to the mail boxes.
